

Assure Safe Food Contact Materials

Materials used in packaging systems intended for food contact must be evaluated for their potential to transfer harmful substances to food. Each operator in the supply chain manufacturing or selling Food Contact Materials has the responsibility to demonstrate compliance with all applicable rules for materials that are intended to be used in or as a Food Contact Material. SAXOCON provides you with everything you need to establish and document compliance with regulatory requirements for Food Contact Materials packaging including:

- Selection and characterisation of construction materials
- A risk analysis according to compliance criteria in EU and/or FDA guidelines
- Migration test strategies including Non Intentionally Added Substances
- A review of protocol and monitoring of studies
- A toxicological risk assessment of results

Why choose us?

SAXOCON services for the food industry give you access to:

- Extensive experience in state-of-the-art safety assessment of food contact materials in accordance with regulatory guidelines
- A multidisciplinary team of highly skilled toxicologists, material scientists, and supply chain professionals
- Safety evaluations based on proprietary information obtained from our world-wide network of materials suppliers
- Smart, cost-effective test strategies that bring your products to market in a timely manner

Delivery

SAXOCON compiles all necessary documentation for you to set up a Declaration of Compliance with relevant regional requirements.
