

# Are your materials ready for Food and Healthcare Products?

Robust materials selection is key to meeting regulatory requirements and avoiding delays in time-to-market for Healthcare Products. Each operator in the supply chain for manufacturing or selling materials used for food and healthcare applications is responsible for demonstrating compliance with all applicable rules for any materials that are intended to be used in medical devices, personal care products, and the packaging and manufacturing equipment for pharmaceutical and food packaging. SAXOCON provides you with all you need to assure a successful and cost-effective road map to document compliance with regulatory requirements including:

- A toxicological hazard assessment of all chemical constituents of your materials
- A readiness assessment for relevant food and healthcare applications
- An intelligent test strategy for generation of further physical characteristics and chemical analysis of extractable compounds
- A Declaration of Compliance with relevant regulatory requirements

## Why choose us?

SAXOCON services for suppliers of materials for food and healthcare products give you access to:

- A multidisciplinary team of highly skilled toxicologists, material scientists, and supply chain professionals
- Extensive experience in state-of-the-art safety evaluations according to international standards and regional regulatory guidelines
- Safety evaluations based on proprietary information obtained from our world-wide network of materials suppliers
- Smart, cost-effective test strategies for supporting your costumers with the highest degree of readiness

## Delivery

SAXOCON compiles all necessary documentation for you to set up a Declaration of Compliance with relevant regulatory requirements for relevant food and healthcare applications.
