

## Keep track of SVHC in your products

*EC Regulation 1907/2006* on the Registration, Evaluation, Authorisation and Restriction of Chemical substances (REACH) describes Substances of Very High Concern (SVHC) as causing cancer, toxic to reproduction, disrupting endocrine function, and/or being very persistent in the environment. REACH regulation requires that the importers, producers, and suppliers of all products marketed in the EU (i.e., manufactured tangible products, which are not chemical substances or mixtures) track the presence of SVHCs from each operator in the supply chain, including those from outside the EU. Furthermore, suppliers shall notify the European Chemical Agency if more than 0.1 % w/w of an SVHC is present.

SAXOCON provides you with everything you need to track, submit, and maintain SVHC information throughout your supply chain in accordance with regulatory requirements, including:

- Gathering relevant information about chemical constituents in your raw materials
- The identification and future monitoring for the presence of SVHC
- Submission of data via the Substances of Concern In Products (SCIP) database

### Why choose us?

SAXOCON services for the suppliers of consumer products give you access to:

- A multidisciplinary team of highly skilled toxicologists, material scientists, and supply chain professionals
- Data gathering of proprietary information obtained from our worldwide network of materials suppliers
- Extensive knowledge of REACH regulation and EU Classification and Labelling of chemical substances
- Best-in-class experience with SCIP submission and other REACH-IT solutions

### Delivery

SAXOCON compiles a written report comprising the toxicological information necessary for fulfilling REACH requirements.
